# Seminar 11
## week 11 (6 December 2021 – 10 December 2021)

1. Discussion of the the assignment A7 (A7 is the last assignment).
2. Discussion/questions about the previous assignments.
3. Discussion about the possible problems for the final practical exam: implementation of syncronization mechanisms (lock, countdownlatch, semaphore, barrier, atomic operations), implementations of new IO operations (buffered writing/reading, writing to a file), implementaion of some communications primitives (send/receive) between threads, adding procedures to the ToyLanguage, etc. Any other sugestions are welcome!
